

Sonu Thakur

Technical Product Manager

+1 (520) 233-0317 | connect.sonuthakurwork@gmail.com | Austin, TX | [linkedin](#) | [portfolio](#)

SUMMARY

Technical Product Manager with 6+ years of experience leading enterprise platform modernization, Agile product delivery, AI-enabled workflow automation, and infrastructure transformation initiatives. Proven track record delivering \$48M+ business impact through roadmap execution, stakeholder management, data-driven prioritization, and cross-functional collaboration across global teams.

PROFESSIONAL EXPERIENCE

Technical Product Manager, Cutting Edge Tech | Austin, TX

Sep 2025 - Present

- Owned roadmap execution across infrastructure and logistics platforms, aligning delivery priorities, stakeholder expectations, and operational goals for three concurrent enterprise initiatives.
- Led ServiceNow and Jira workflow automation initiatives, reducing onboarding cycle time by 20% while improving operational scalability and enterprise process efficiency significantly.
- Partnered with stakeholders defining product requirements, BRDs, and implementation strategies aligning technical execution with measurable operational and customer-focused business outcomes.
- Improved Jira and Confluence adoption by 30% through workflow redesign, process optimization, and enablement strategies enhancing organizational productivity and collaboration efficiency.

Product Owner, SiriusXM Radio | Austin, TX

Jun 2023 - Mar 2025

- Led enterprise timesheet transformation initiative replacing legacy systems, delivering \$48M annual savings through roadmap prioritization, adoption strategy, and cross-functional product execution.
- Owned roadmap and feature prioritization for internal productivity tooling, increasing operational efficiency by 25% through iterative releases and stakeholder-driven product enhancements.
- Mentored four engineering teams on Agile product delivery practices, improving sprint predictability by 19% through Jira workflow redesign and process optimization initiatives.
- Reduced operational bottlenecks by 35% through KPI-driven reporting dashboards, stakeholder communication strategies, and data-informed product decision-making frameworks organization-wide.
- Piloted LLM-based workflow automation capabilities for intake triage and reporting workflows, demonstrating measurable productivity gains and informing enterprise AI product strategy.

Associate Product Analyst Intern, SiriusXM Radio | Austin, TX

Feb 2023 - May 2023

- Conducted KPI-driven analysis supporting Jira Server-to-Data Center migration, improving infrastructure uptime by 40% and enhancing enterprise platform reliability significantly organization-wide.
- Defined product requirements and acceptance criteria for Jira customization initiatives, increasing adoption rates by 25% across cross-functional engineering and operations teams.

Agile Product Operations Intern, LoanDepot | Plano, TX

Jun 2022 - Aug 2022

- Facilitated Agile product operations for cross-functional teams, improving sprint velocity by 20% through structured planning, retrospectives, and backlog prioritization processes consistently.
- Collaborated with Product Owners refining backlog priorities and user stories, ensuring sprint deliverables aligned closely with measurable customer and business objectives.

Associate Product Manager, Infosys Limited | Pune, India

Jun 2019 - May 2021

- Led digital payments integration initiative for Tier 1 banking client, coordinating requirements, UAT execution, and stakeholder alignment across globally distributed enterprise teams.
- Managed self-service platform launch across three enterprise platforms within eleven months, owning roadmap execution, stakeholder coordination, and cross-functional product delivery successfully.
- Conducted customer segmentation and market analysis increasing product awareness by 45%, influencing go-to-market strategy and enterprise engagement outcomes across target audiences.
